Wall-mounted

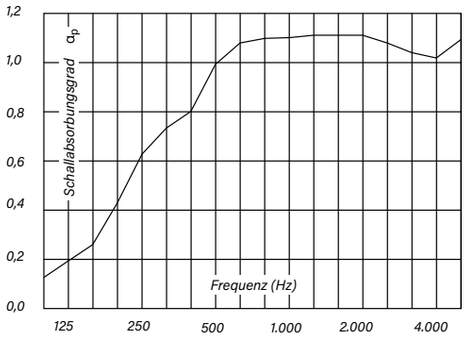
Wall Absorber 40 with Changeable Cover

Lightness and Elegance

The fabric cover, which is stretched over the 40 mm absorber core, is equipped with a circumferential piping and can thus be removed easily and without tools at any time. The cover can be cleaned easily and professionally and can also be replaced if necessary. **Wall absorbers 40 with changeable covers** are also ideally suited for use with digitally printed fabric surfaces. The profile, which is tapered by 45 degrees to the rear, lends the surfaces lightness and elegance - and this despite the stable aluminium profiles, thanks to which even very large formats can be implemented. The standard dimensions range from 400 x 400 mm up to 1,400 x 2,000 mm and with digital printing up to 2,000 x 2,000 mm. A suspension fitting with precise height adjustment guarantees quick and safe installation.

The **wall absorbers 40 with changeable covers** are available in 17 fabric collections - and also with digital print. Motifs of very different origins can be used, provided the image quality is suitable. Optionally, this wall absorber can also be equipped with a cover that can serve as a projection surface for beamers.

Wall Absorber 40
with Changeable Cover



Sound absorption level –
octave centre frequency (40 mm)

Wall absorber 40 with changeable cover, digitally printed

The elements with changeable covers are also ideally suited for use with digitally printed fabric surfaces.
