## Base- & WallBox

*Powerful in open office structures*

---

**R**elaxed and concentrated telephoning - in an open office space - not a matter of course. With precise room acoustic planning and the use of high-performance products, open and flexible office concepts offer very good working conditions for a wide range of activities. The **BaseBox** and **WallBox** impress with their clear design language and good sound absorption performance. **BaseBox** and **WallBox** are available with a wall thickness of 40 mm. The edge design with internal fabric profiles gives the high-performance absorber walls an elegant lightness and makes it possible to play with different fabric qualities and colours. There are 17 fabric collections to choose from - divided into 5 price groups. Equipment

modules such as the storage board with integrated Powerdot and the ceiling-integrated LED light in the **BaseBox** offer added comfort and function. The PowerDot integrated in the shelf is also optionally available for the **WallBox**.

BaseBox M

BaseBox L

Equipped with magnetic surface

BaseBox M / L  
Magnetic back on the inside  
over storage board
