AgilityWall Mood

AgilityWall is a broad product family, mobile and equipped with a variety of functions and technical features. It supports creative work processes and enables new forms of organisation away from entrenched structures. Equipped with smooth-running universal castors and a concealed aluminium frame, the fully upholstered AgilityWall Mood becomes the centrepiece for communication and coworking zones.

The functions are manifold and range from a highly sound-absorbing pinboard to a glass whiteboard and flipchart to shelving modules. But that's not all: two further modules offer organiser trays and profiles for versatile placement of plants, among other things. These extend either over the entire height or over a partial area in combination with shelves.

AgilityWall Mood is communication, presentation, organisation and always also acoustic and visual interior design. The modules are available in three heights (1600, 1800 and 2000 mm), in five widths (800, 900, 1000, 1200 and 1600 mm) and in two designs. The design of the AgilitWall Mood walls, fully upholstered with fabric, is cosy, soft and full of character.
