Collection Overview

Acoustic felts made from 100% new sheep's wool

The natural base material virgin sheep's wool forms the basis for the 9 mm thick AOS acoustic felts. The collection with 12 colours offers a wide range of design options. The acoustic felts are used in the AOS product series PUR12 Frame nature. Due to the natural material virgin sheep's wool, slight colour deviations and vegetation in the felt are possible, please note this especially for colour 55 natural white.

New sheep's wool is a renewable raw material, ecological and recyclable - from nature to nature - and therefore 100% sustainable.

New sheep's wool from Upper Austria is used - uniquely reliable also in terms of safety.

Due to the consistent use of 100% new sheep's wool, the special processing technology and the innovative, biocide-free wool protection Ionic Protect, the new sheep's wool acoustic filling achieves fire protection classification D according to EN 13501-1.

New sheep's wool as acoustic filling material - area of application

Family	Product	
Acoustic Elements	Suspended Screen	
Ceiling & Wall Absorber	Wall Absorber 50/40
