

Silence Point Concept

Silence Point is a versatile product family with the best acoustic properties, developed and optimized over many years. The modular system is broad and ranges from the classic museum bench to various sofa variants to complete work islands with or without a roof.

Straightforward and straightforward in design and with an extremely comfortable seat and back upholstery, the Silence Point models have the potential to become a “favorite place”. Whether on the open office space, in the stairwell or in the reception area, the models available in three heights, from 1100 mm to 1400 mm to 1700 mm, create islands of calm and relaxation. What remains hidden from the eye, the wall structure is highly sound-absorbing at the core, thus ensuring excellent comfort. The models are available as one, two or three-seaters. There are 9 fabric collections to choose from for the wall structure, with an almost unlimited selection of structures and colours. Seating comfort and ergonomic equipment with an invitingly soft back cushion are geared towards the requirements of everyday office life and its surroundings. The lovingly fully upholstered walls are offered on one side or optionally also on both sides in a quilted version. Quilting options on request. There are 8 fabric collections with different characters and colours available for this purpose.
