

Silence Point Stream

Silence Point is a versatile product family with the best acoustic properties, developed and optimized over many years. The modular system is broad and ranges from the classic museum bench to various sofa variants to complete work islands with or without a roof.

A clear design language and excellent seating comfort, Silence Point Stream combines function and modern design for an extra portion of cosiness. The inviting models are at home in open office spaces, in the hotel lounge, as well as in stores and showrooms. The models, available in two heights of 940 and 1100 mm, create comfortable islands for lingering and relaxing. What remains hidden from the eye, the wall structure is highly sound absorbing at the core and thus contributes to good room acoustics. The models are available as one, two or three-seaters. There are 9 fabric collections to choose from for the wall structure, with an almost unlimited selection of structures and colours. This makes the Silence Point models a favorite place with character and an unmistakable appearance. Sitting comfort and ergonomic equipment with an invitingly soft back cushion are geared towards the requirements of the project. The lovingly fully upholstered walls are offered on one side or optionally also on both sides in a quilted version. Quilting options on request. There are 8 fabric qualities with different characters available for this purpose.
